Production value refers to the total value or gross output of mineral extracted during the reporting period as defined in Chapter XXIX, Section 270 of the DAO 2010-21 of the Philippine Mining Act of 1995 (under the term "Gross Output")

Gross Value Added (GVA) - measures the contribution of a particular sector to the country's GNP; computed by subtracting the cost of production inputs from the gross output of a particular industry. Total GVA does not include crude oil and coal.
